

**Institution/Company:**

University of British Columbia

**Location:**

Vancouver, BC, Canada

**Job Description:**

The Av-Gay's lab (<http://www.vchri.ca/researchers/yossef-av-gay>) at UBC is looking for a motivated postdoctoral fellow with a background in Microbial genetics or Biochemistry and experienced with microbiological methods.

The postdoctoral fellow will lead an innovative development of drug screening approach aiming at the identification of novel compounds active against intracellular Mycobacteria.

Ideal candidate will have:

- Experience in molecular biology tools
- Familiarity microbiological and drug screening methods.
- Peer-reviewed publications.
- Experience with microbial genomics.

The position is for 2 years, beginning April 1, 2017 or as soon as possible thereafter, contingent on performance.

Please submit a statement of interest, a CV, and contact details of 2 reference to [yossi@mail.ubc.ca](mailto:yossi@mail.ubc.ca).

UBC hires on the basis of merit and is strongly committed to equity and diversity within its community. We especially welcome applications from visible minority group members, women, Aboriginal persons, persons with disabilities, persons of minority sexual orientations and gender identities, and others with the skills and knowledge to productively engage with diverse communities. All qualified candidates are encouraged to apply; however Canadians and permanent residents will be given priority.
